## **SIA-Technical Booklets**

The SIA issues technical booklets in order to explain and provide supplementary regulations on special subjects.

The technical booklets form part of the SIA's body of standards.

Technical booklets are valid for three years following their publication. Their validity can be extended repeatedly by three years.

## IMPRINT

This technical booklet was revised, under the direction of the SIA and at the request of the Quality Platform, by the Quality Committee, which bears responsibility for the content of the technical booklet, and by the Training Platform, which develops comprehensive training options. A working group was employed to compile the basic information.
